EPA is required to collect this information as part of its consent decree with the Sierra Club, which was amended in 1997. EPA is authorized to collect this information under § 1421 of the SDWA, 42 USC §300h. Responses to this collection are voluntary. The public reporting and recordkeeping burden for this collection of information is estimated to average 2 hours per response. Burden means the total time, effort, or financial resources expended by persons to generate, maintain, retain, or disclose or provide information to or for a Federal agency. This includes the time needed to review instructions; develop, acquire, install, and utilize technology and systems for the purposes of collecting, validating, and verifying information, processing and maintaining information, and disclosing and providing information; adjust the existing ways to comply with any previously applicable instructions and requirements; train personnel to be able to respond to a collection of information; search data sources; complete and review the collection of information; and transmit or otherwise disclose the information. An agency may not conduct or sponsor, and a person is not required to respond to, a collection of information unless it displays a currently valid OMB control number. The OMB control numbers for EPA's regulations are listed in 40 CFR Part 9 and 48 CFR Chapter 15. Send comments on the Agency's need for this information, the accuracy of the provided burden estimates, and any suggested methods for minimizing respondent burden, including through the use of automated collection techniques to the Director, OPPE Regulatory Information Division • U.S. Environmental Protection Agency (2137) • 401 M St., S.W. • Washington, D.C. 20460 • ; and to the Office of Information and Regulatory Affairs, Office of Management and Budget • 725 17th Street, N.W. • Washington, D.C. 20503 • Attention: Desk Officer for EPA. • Include the EPA ICR number and OMB control number in any correspondence. Do not send the completed form to this address.

Information Collection on Industrial Wells

DEFINITION: Industrial wells not addressed in current rule making efforts are being studied. These include non-contact cooling water return flow wells, laundromats without dry cleaning facilities, carwashes without undercarriage washing or engine cleaning, and food processing disposal wells.

We are only asking you to submit data that has already been collected by the State and is readily available. Please answer the following questions to the extent possible based on existing data.

1. Regulations

We are obtaining regulations from the State Underground Injection Control (UIC) program. If industrial wells are regulated under a separate statute or regulation, please provide the citation(s) below or attach appropriate copies.

9 Check if attached.

2. Number of Non-Contact Cooling Water Return Flow Wells, Laundromats Without Dry Cleaning Facilities, Carwashes Without Undercarriage Washing or Engine Cleaning, and Food Processing Disposal Wells

2a. For each of the following, indicate the number that can be documented in the State (excluding wells that have been permanently plugged and abandoned).

Non-contact cooling water return flow wells: _____

Injection wells used at laundromats without dry cleaning facilities: _____

Injection wells used at carwashes without undercarriage washing or engine cleaning: _____

Injection wells used for food processing disposal: _____

2b. In your judgement, does the number given in 2a accurately reflect the number of wells in the State?

9 Yes ☒ Go to Question 3.

9 No ☐

- 2c. Please estimate of the number of each of the following types of wells in the State (excluding wells that have been permanently plugged and abandoned):

Non-contact cooling water return flow wells: _____

Injection wells used at laundromats without dry cleaning facilities: _____

Injection wells used at carwashes without undercarriage washing or engine cleaning: _____

Injection wells used for food processing disposal: _____

- 2d. What is the source of the estimates given in 2c (e.g., survey, model, best professional judgement)?

Please explain the methodology(ies) used to derive the estimate.

3. Location of Industrial Wells (Non-Contact Cooling Water Return Flow Wells, Laundromats Without Dry Cleaning Facilities, Carwashes Without Undercarriage Washing or Engine Cleaning, and Food Processing Disposal Wells).

Please provide the location of each non-contact cooling water return flow well, laundromat without dry cleaning facilities, carwash without undercarriage washing or engine cleaning, and food processing disposal well in your inventory. We latitude and longitude coordinates (a). If that information is not available, provide other location information such as zip code (b), county (c), Quarter/Section/Township/Range (Q/S/T/R) coordinates, or other identifying information (d). If you have a database containing this information, you may submit in any format that is convenient for you instead of completing the following table. If completing the table or submitting information will be extremely time consuming or financially burdensome, please contact the Class V coordinator (see cover page). Please copy this page if you need additional lines.

One well per line please.

Well Type	Unique well identifier (e.g., permit no., operator name)	PLEASE COMPLETE (a), (b), (c), or (d). WE PREFER (a).				
		(a) Latitude/ Longitude (to minutes)		(b) Zip Code	(c) County Name	(d) Other Location Information (e.g., Q/S/T/R, UTM)
		Latitude	Longitude			

4. What criteria does the State use to classify wells as industrial (as opposed to storm water wells, septic systems, etc.)?

Please describe, or attach appropriate information. **9** Check if information attached.

5. Does the State have construction and/or siting requirements for industrial wells?

9 Yes **ÿ** Please describe briefly below, or attach appropriate information. **9** Check if information attached.

9 No **ÿ** Go to Question 8.

6. Do the construction and/or siting requirements vary based on the industry or type of well?

9 Yes **ÿ** Please describe briefly below, or attach appropriate information. **9** Check if information attached.

9 No

7. Does the State conduct inspections or review records to ensure that construction/siting requirements are met?

9 Yes **ÿ** Please describe briefly below.

9 No

8. Does the State have operating requirements (e.g., contaminant limits, monitoring requirements, best management practices (BMPs))?

9 Yes **ÿ** Please describe briefly below, or attach appropriate information. **9** Check if information attached.

9 No **ÿ** Go to Question 10.

9. Does the State conduct inspections or review records to ensure that operating requirements are met?

9 Yes **ÿ** Please describe briefly below.

9 No

10. Are you aware of studies of ground water quality to assess the impact of industrial wells on Underground Sources of Drinking Water (USDWs)?

☐ Yes ☐ From whom are these studies available?
☐ No

11. Have there been any incidents in your State in which an industrial well (non-contact cooling water return flow wells, injection wells at laundromats without dry cleaning facilities, injection wells at carwashes without undercarriage washing or engine cleaning, or food processing injection wells) contributed to contamination of an Underground Source of Drinking Water (USDW)? Contamination can include exceedances of Federal or State drinking water standards, ground water standards, or health advisory levels.

☐ Yes ☐ If any study or description of the incident exist, please provide us a copy. If not, please provide a brief summary for each incident. To the extent this information is available, include a description of what happened, the impact on ground water quality or drinking water wells (public or private), the date of the incident, the name of the city or county in which the incident occurred, and the name and phone number of a contact for follow up. ☐ Check if description(s) attached.

☐ No
☐ Don't Know

<p>Please Go To Page 7 and Complete the Additional Contacts Section.</p>

Additional Contacts

Please list individuals that could help answer our questions on industrial wells. Include individuals from other State programs, local programs, or institutions such as universities, as appropriate.
